

AirFlow Range

The compressors in the *AirFlow* series are perfectly matched to each of our generator's air requirements.

They are also suitable for any user requiring compressed air for their processes.

For applications which require dry compressed air, a suitable dryer from our MDH range can be mounted inside the compressor cabinet and will reduce the pressure dew point to either -40°C or -70°C.

Features & Benefits:

- * Oil-free design for low maintenance & long life
- * Silenced acoustic cabinet
- * Optional integrated dryer
- * Two year warranty
- * Maintenance contracts available for additional peace of mind

Choose your system:

Model	AirFlow 100	AirFlow 200	AirFlow 300
Displacement L/min	120	160	320
FAD at 10bar	65	78	156
Max Outlet Pressure	10bar/147psig		
Dimensions dxwxh (mm)	720x500x810		590x1000x835
Electrical Requirements	240VAC		
Tank Size	25Litre	25Litre	40Litre
Noise Level (dBA)	54-59	59-62	64-72

Match your AirFlow:

Model	AirFlow 100	AirFlow 200	AirFlow 300	
In House Gas Nitrogen Generators	N ₂ Flow 1L N ₂ Flow 2L N ₂ Flow 3L N ₂ Flow 5L	N ₂ Flow 10L N ₂ MaxiFlow 15	N ₂ MaxiFlow 30 N ₂ MaxiFlow 100 N ₂ MaxiFlow 150	
In House Gas PureFlow Generators	All PureFlow generators will work with AirFlow 100			
In House Gas Clean Dry Air Range	MDH Series HR1 VSA1	HR2 VSA2	HR3 VSA3	HR4 VSA4

FAQ's

How much do they cost?

The AirFlow compressor costs vary. We work with you to properly size the system to meet your requirements. Once this is done we can make a formal price quote. We include a two year warranty and no-quibble guarantee with all our AirFlow compressors.

Please tell us more about your application needs.

Do you have any references?

Yes. We would be delighted to offer a number of references.

Do you rent or lease your systems?

Yes, please contact us for details.

What are the Maintenance Costs?

Filter cartridges need to be replaced based on a maintenance schedule. The maintenance is a simple procedure which can be carried out on the field, and the running costs of the system are low. But for extra peace of mind we do offer Spares Kits that obtain all standard parts

Please Contact us for more Details.

Can I change the flow of the system?

NO!! This will make your warranty void. Do not open up the system without calling In House Gas.

We reserve the right to change and modify any product specifications or design. Error and omissions accepted
